

# Module 2

## *The Modern API - Implementation*

# Overview

You have completed the design of the Omni Channel API and now you are ready to implement it. In this module, we will create the implementation of our API that will process the REST requests.

The Module is separated into four different labs.

- [Lab 1: Implement the Omni Channel API in Studio](#)
- [Lab 2: Download the complete Omni Channel project](#)
- [Lab 3: Deploy the Omni Channel API implementation](#)
- [Lab 4: \(Optional\) Explore Exchange for Complete System, Process and Experience APIs](#)

Please proceed to [Lab 1](#)
